i don't have a snake or reptile, but would love to see some pictures of some if people have any. is it easy to look after a snake - who looks after them if you want to go away on holiday?

Hi,

Snakes are easy to keep as long as you select the right species and get the right advice on the equipment you use. Corn snakes are great, calm and easy to handle, love their food. They also come in many different colours.

Here is a picture of one of mine. It's a ghost corn.

They are very low maintenance and only need feeding once a week, so when you go on holiday you just need a friend to check their water and heat.
