Hi everyone,

I'm a Business Student at Nottingham Trent University. I love pet, especially dog and cat. I got two lovely and naughty cats and a small funny and cute dog. To be with them, I really feel happy, relax and peaceful. I like to play and tease them. I love them and wish to bring the best things to them.

I am carrying out a survey for my dissertation about Pet Food in order to understand whether Pet Food customers satisfy with the products and what will help to improve their satisfaction. Would you please help me answer this short survey? It definitely takes only less than 5 minutes. It is just like a game with ten clicks.

The result will be shown off here. I think it will be interesting to know the important factor that Pet Food customers care most and some interesting about their habit.

I know it might bother you from taking this. Nevertheless, your help in this survey means a lot to my study and me. I did not carry out it for any financial reason, just for my study. So please help me by clicking the following Link and answer 10 easy questions, PLEASE.

All the best wishes to you and your pets
Many thanks.
